3. Place auger into the tube, long end first, by turning auger slightly until it is set into motor housing and cover the transmission shaft.
4. Place cutting blade onto auger with the blade facing the front as illustrated.
 - If it is not fitted properly, meat will not be ground.

6. Screw the locking ring onto the auger tube.
7. Do not over tighten. Place hopper plate on head and fix into position.
8. Position the unit on a firm surface.
 - The air passage at the bottom and the side of motor housing should be kept free and not blocked, maintain a minimum of 4"/10cm free space around the grinder.

1. Use the pusher to feed the meat into the grinder.
 - After use, switch off and unplug.

TROUBLE SHOOTING:
