- Save on water and energy usage with Eco Settings
- Find inspiration and support on our app
- Select, customize and save drinks on intuitive display

** Based on consumer testing in Germany comparing leading One Touch (Coffee + Milk) Full Automatic Espresso Machines (2023)

***When compared to previous Philips espresso machines

*****Based on 8 filter replacements as indicated by the machine. Actual number of cups depends on selected coffee varieties, rinsing and cleaning patterns

Highlights

12 hot & iced drinks

Our 12 recipes range from warming drinks like espresso, milky lattes and cappuccinos, right through to cooling iced coffees. We've calibrated our brewing system so even iced coffees have the same delicious flavour as hot drinks.

LatteGo milk system

Our powerful cyclonic frothing technology lets you create silky smooth milk froth at the touch of a button, even with plant-based milk alternatives.

SilentBrew technology

Our patented SilentBrew technology reduces machine sounds so you can enjoy the experience of brewing aromatic coffee more. Using sound shielding and quiet grinding, our machines make 40% less noise than earlier models and come with a Quiet Mark certification.

The fastest to clean milk system*

With just two parts and no tubes, our milk system can be cleaned in under 10 seconds, in the dishwasher or under a tap. Philips doesn't offer automatic cleaning as it requires complementary cleaning.

QuickStart

No more waiting for your machine to warm up. Our QuickStart function allows you to power on your machine and brew a coffee right away. Your machine will heat up based on the selected recipe.

100% ceramic grinders

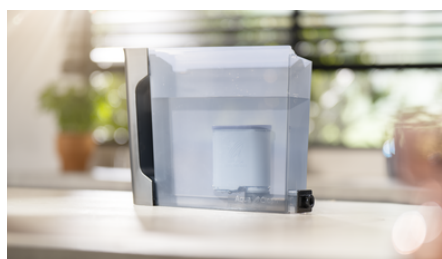

Bring out the full flavour of your beans with our hardwearing ceramic grinder. Fine-tune the grind size using one of 12 settings, from fine to coarse.

Perfect temperature and aroma

Our Aroma Extract system finds the ideal balance between temperature and aroma by keeping the water temperature between 195F and 210F, all while regulating the water flow rate.

AquaClean filter

Brew up to 5000 cups without having to descale using an AquaClean filter. It purifies water before brewing begins so your coffee tastes more flavoursome.

Eco Settings

Use one of five Eco Settings to reduce water and energy consumption, without compromising on coffee quality. Our 4400 series allows you to dim the main and cup lights earlier than the default time, use less water while rinsing, switch to standby mode more quickly, or dim brightness.

Specifications

Technical specifications

Voltage: 110 V
Capacity milk carafe: 880 oz
Capacity water tank: 60.8 oz
Weight of product: 17.6 lbs
Cord length: 120 cm
Frequency: 60 Hz
Coffee bean capacity: 275 g
Waste container: Frontal access
Water tank: Frontal access
Filter compatibility: AquaClean
Pump pressure: 15 Bar
Colour & Finish: Grey, Chrome
Product dimensions: 246x371x433 mm
Coffee waste container: 12 servings

Sustainability

Power consumption brewing: 110 V
ECO setting: Yes
